**Maths:** The link you need to access the above activities for Maths is <https://whiterosemaths.com/homelearning/year-2/>

“Every child is a unique child of God.”

On Monday browse to **Week 2** and complete Lesson 5. On Tuesday you will need to go to **Summer Term 1** and complete lesson 1 etc. For each of the maths lessons there is a video tutorial to watch, linked tasks and answers. The tasks and the answer pages are on the website. The tutorial videos do some input teaching which the children can use to help them with the tasks. If you can, or want to print the tasks, that is fine (then stick them into your Home Learning Book) or just read the questions off the screen and write the answers into your book (where possible).

**Project for the week – Discovering Africa**

**Discovering Africa - Activity: The Climate in Africa**

Last week you thought about the items you would need to take with you Kenya – thinking carefully about the climate and the activities you would be doing whilst you were there.

Task 1 – Complete the attached sheet ‘How is the climate in Kenya different to the climate in the UK?’ I have given you a set of statements and you need to decide whether the statement relates to the climate in Kenya or the climate in the UK. I have also attached the Africa powerpoint from last week so you can recap the information related to Kenya and its climate.

**Science**

Mrs B has attached some science work related to our summer Science Topic ‘Taking Care of Myself.’ Mrs B would like you to complete a ‘Healthy Living Commitment Pledge’ – please see the attached example and record your pledge in your home learning books.
